

At Trinity College, we have two systems that allow students, staff, and faculty to communicate and exchange information necessary to be successful in the classrooms and throughout your college experience here.

Our LMS (Learning Management System) is [eCampusWeb](#). This system is used to view current courses assignments, attendance records, other students in your class, course syllabus, and class discussions.

Our [KanopySIS](#) (Student Information system) will allow you to view student finances, register for classes (during open enrollment times) and search the Library for resources relating to a project or assignment.

It is important to keep the passwords for these accounts, as well as any other account, private since they contains personal data that you may not want others to see.

The IT department is here to enable and help you as a student succeed here at Trinity College of Florida. If you have any needs, questions, or concerns, please e-mail us at:

helpdesk@trinitycollege.edu

Blessings,

The IT Team
